# **Economic Overview And Outlook: Texas**

#### **JOBS**

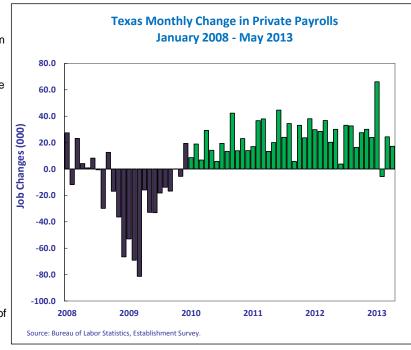

- Including May, the private sector has gained jobs nationwide for 39 consecutive months.
- In Texas, private sector employment fell by 4.5 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 11.2 percent.
- In Texas, employees in the manufacturing, construction, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Texas have experienced the greatest employment increases: mining; professional and business services; and leisure and hospitality.\*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

### **EMPLOYMENT**

- The unemployment rate in Texas was 6.5 percent in May 2013, up 2.1 percentage points from December 2007, but down from its most recent peak of 8.3 percent in March 2010.
- 834,000 residents were counted among the unemployed in Texas during May 2013.
- In Texas, initial claims for unemployment insurance benefits totaled 74,741 during May, down 1.4 percent from the previous month. Since peaking at 136,092 in September 2008, initial claims for unemployment insurance benefits have declined by 45.1 percent.

## EARNINGS

Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 4th quarter of 2012, total personal income is 3.3 percent above its 4th quarter of 2007 level.

Real per capita personal income (in 2005 \$) in Texas was \$36,124.20 in the 4th quarter of 2012, up from \$34,808.10 in the 4th quarter of 2010.

### Housing

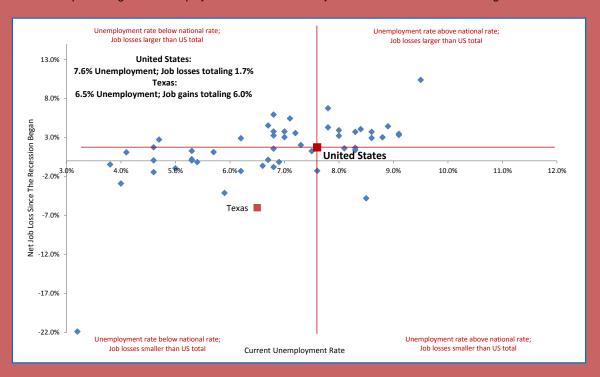

- After peaking in the first quarter of 2007, national home prices declined by 17.8 percent over 17 quarters. Between the second quarter of 2011 and the first quarter of 2013, the most recent quarter, national home prices rose by 2.4 percent.
- In Texas, home prices have risen by 0.1 percent from the previous peak set in the first quarter of 2009.
- As of the 1st quarter of 2013, 1.5 percent of all mortgages, including 5.0 percent of subprime mortgages, were in foreclosure in Texas.
- Housing starts in Texas totaled 121,070 units (seasonally adjusted annual rate) in April 2013, a decrease of 28.4 percent from March.
- Within the South census region, which includes Texas, sales of new single-family homes totaled 242,000 units in April 2013, an increase of 3.0 percent from March. Sales of existing single-family homes increased 5.7 percent to 1,850,000 units (at seasonally adjusted annual rates) from April to May 2013.

# How Does Texas Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Texas to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Texas since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Texas.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.
